

i did not really listen to the radion be xm and i listen to the radio even less now that i have xm. whenever i have to listen to the radio for a traffiic report it takes 15 minutes or before the have a report. that time could be the difference between sitting in traffic longer thn i should. with xm i could get what i need when i need it. broadcast radio is useless. i will continue to pay for xm. it is a far better option. tell broadcast radio to step up to the plate and improve there service. thank you.
